

# IDIS Cloud Manager

## Manage All Your Sites in The Cloud

- Remote management of individual facilities and branches
- Remote set-up of recorders and cameras
- Powerful and flexible live monitoring on the move using a divided layout of up to 64-channels
- Check the status of network access of branches and devices
- Search up to 64-channels simultaneously via time lapse, event or text-in or simple time movement
- Ability to drag and drop, silky-smooth PTZ controls including the Smart UX 'Rubber Band' function, remote fisheye dewarping, option to preset 10 types of layouts, and two-way audio
- Intuitive dashboard shows the numbers of branches and devices
- Quickly back up or clip videos using the IDIS Player as save .avi files or screen print images
- Push notification from all registered devices to IDIS Mobile Client and access to the real-time situation by a simple touch on the push message.
